

Giant International Introduces the Olympia® P324 Business Two-Way Radio at IWCE

Powerful UHF Radio Features 4 Watt or 1 Watt Selectable Power Output and 32 Programmable Channel Memories at an Affordable Price

LAS VEGAS – 16 March, 2009 – Giant International today unveiled its Olympia® P324 business two-way radio at the International Wireless Communications Expo (IWCE) in Las Vegas at booth #442. The P324 radio combines powerful UHF communications with convenient features at an affordable price, providing businesses a practical communication solution in today's value conscious economy.

“The Olympia P324 radio was designed to meet the demands of business users by providing a powerful, high quality two-way radio at a competitive price,” said Bob Donnellan, director of sales for Olympia at Giant International. “In these challenging economic conditions, we are introducing a reliable and flexible communication alternative to businesses.”

Powerful & Versatile Connections for Optimal Productivity

The Olympia P324 is designed to meet several different needs within a business' organization. With 4 Watt and 1 Watt selectable output power, the Olympia P324 radio allows users the option to choose the power suitable to their unique work environment over most of the 400 MHz spectrum. These radios are ideal for use from the front office to the warehouse.

The Olympia P324 is also a fully programmable radio with 32 channels. This allows businesses to use the radio on their fixed frequencies. The radio is also repeater capable. For those companies who use itinerant frequencies the first 10 channels come pre-programmed on the common itinerant frequencies.

Convenient Communications for Maximum Efficiency

Weighing in at 7.9 ounces, the Olympia P324 radio is lightweight, small and easy-to-use. The ergonomic and compact design allows for seamless mobility making it ideally suited for small warehouses, restaurants, retail, event coordination and hotel workplace settings. And, with 133 codes employees can easily filter out other conversations.

Additional features include a hands free operation mode, a time-out timer to prevent accidental transmissions, battery save function and audible low battery alert.

The Olympia P324 features a lithium ion battery pack and drop in charger, providing an estimated battery life of 16 hours at 1 Watt or 9 hours at 4 Watts on a 5-5-90 cycle. A complete line of accessories are also available.

Olympia P324 Key Features:

- Supports up to 32 channels (10 pre-programmed)
- Programmable UHF frequencies
- 133 Interference eliminator codes
- 4.0 watt or 1.0 watt selectable output power
